

DIRECTORY & WAYFINDING

Leader in Digital Signage

In 1913 we started building telephone booths. We recognized early that a phone booth without a phone book was not a complete solution. We met this challenge by patenting the original plastic-bound, armored-chorded reference phone book solution that can be found in phone booths today. In this way, RedyRef was born.

As we evolved, we went from manufacturing phone booths all the way to creating computer kiosks and gained 100 years of experience and knowhow along the way to become experts in our field.

Integrated Solution

- 100 years in business, strong financial profile, world class after-market support & repair services
- Made in the U.S.A., operating nationwide; fulfilling globally
- Approximately 300 employees, including ten design/mechanical engineers
- Diversified self-service customer base leader in enclosure design & manufacturing.
- Design to deployment under one roof with 250,000 sq. ft. of manufacturing space
- Superior design & ODM offering
- Leader in software application development
- ISO 9001: 2008 certified, quality control excellence

ENCLOSURE OPTIONS

No matter what your directory or way finding need is, RedyRef has an enclosure solution that will meet all of your requirements. We offer a variety of form factors that can be tailored to your brand and guest needs, including various screen sizes and configurations.
