

FOR IMMEDIATE RELEASE:

SlabbKiosks partners with Ingenico Group to provide EMV-enabled unattended payment devices

Las Vegas, March 29, 2016 - SlabbKiosks, a leader in self-service technology, announced today that it has partnered with [Ingenico Group](#), the global leader in seamless payment, to bring secure, EMV-enabled unattended payment devices to the market. SlabbKiosks, well known for its customized kiosk solutions, will utilize Ingenico Group's unattended payment solutions, and become a member of the company's [Unattended Partner Program](#).

According to Mike Masone, Sales Director at SlabbKiosks, "Ingenico Group's iSelf series represents a departure from typical payment devices. The solutions were designed from the ground up for unattended environments, and Ingenico Group provides unparalleled support, by making in-house engineering and support personnel available to our customers. These customers are spread across many verticals but their needs remain the same - to have simple and secure payment applications developed for their unattended applications."

Ingenico Group's Unattended Partner Program will allow SlabbKiosks to provide secure, EMV- and NFC-enabled unattended self-service payment solutions via its various kiosk models and customized hardware solutions. The Program was designed to facilitate integration among partners allowing them to offer turnkey unattended solutions for a wide variety of uses with secure EMV and NFC payment acceptance built in.

Bruce Rasmussen, Director of Strategic Verticals for Ingenico added, "We're seeing high demand for unattended payment solutions. Companies such as SlabbKiosks want to protect their customers from post-EMV deadline fraud liability, while enabling consumers to pay using the latest payment methods, including Apple Pay and Android Pay. We're looking forward to working closely with SlabbKiosks to bring its new turnkey solutions to market."

About SLABBKIOSKS

SlabbKiosks is a leading international manufacturer and distributor of cost effective, interactive kiosks. The company has installed and customized interactive kiosks for thousands of clients in over 150 countries and distinguishes itself from the competition by offering the latest in technological advancements including the wireless kiosk, while utilizing high quality components with designs that facilitate quick and efficient maintenance of their units.
