FREE MOBILE WAYFINDING APP

Fighting against COVID-19, 22MILES decided to make FREE it's mobile web and content services for all Healthcare Facilities: Hospitals, Clinics and Test Centers.

- This is a simple web URL anybody can easily access
- Each of your organization would get a dedicated link like below:
<https://covid19.22miles.app/>
- We can customize to your domain name
- We recommend to put a link on your website to this tool, which is the only thing IT will need to do
- We, 22MILES and Volunteers, will do all content, setup and hosting
- Or you can use 22M tools to manage content
- All software, tools, hosting and labor are free for combating COVID19

Your logo here

Built-in Multiple Languages
Option to include/exclude

Name your important Messaging
Easily update page content on a web interface (free access), or work with volunteers

Quick wayfinding to map

We/volunteers will manage the maps for you
You, optionally, manage the maps using our tools
Everything free

Optional bottom tool bar with more features

E Ink, Battery Powered Digital Room / Wayfinding Signs

- Free 6 months trial for all health care facilities
- Digital Signage software controlled by 22M platform
- Battery last up to 1-2 years
- 7" – 10.5" common sizes

E Ink, Mobile Sign Board, Powerless

Upload latest information and move the sign to anywhere without need of a power.

The message stays over a year without fading and can be updated as long as power and WiFi available.

Digital Signage with Human Body Temperature Testing

- Available in 22"
- Digital Signage content distribution through 22MILES platform
- Body Temperature testing on the screen
- Can be used at store entrance, hospital, corporate lobby etc
- Can integrate with guest check in

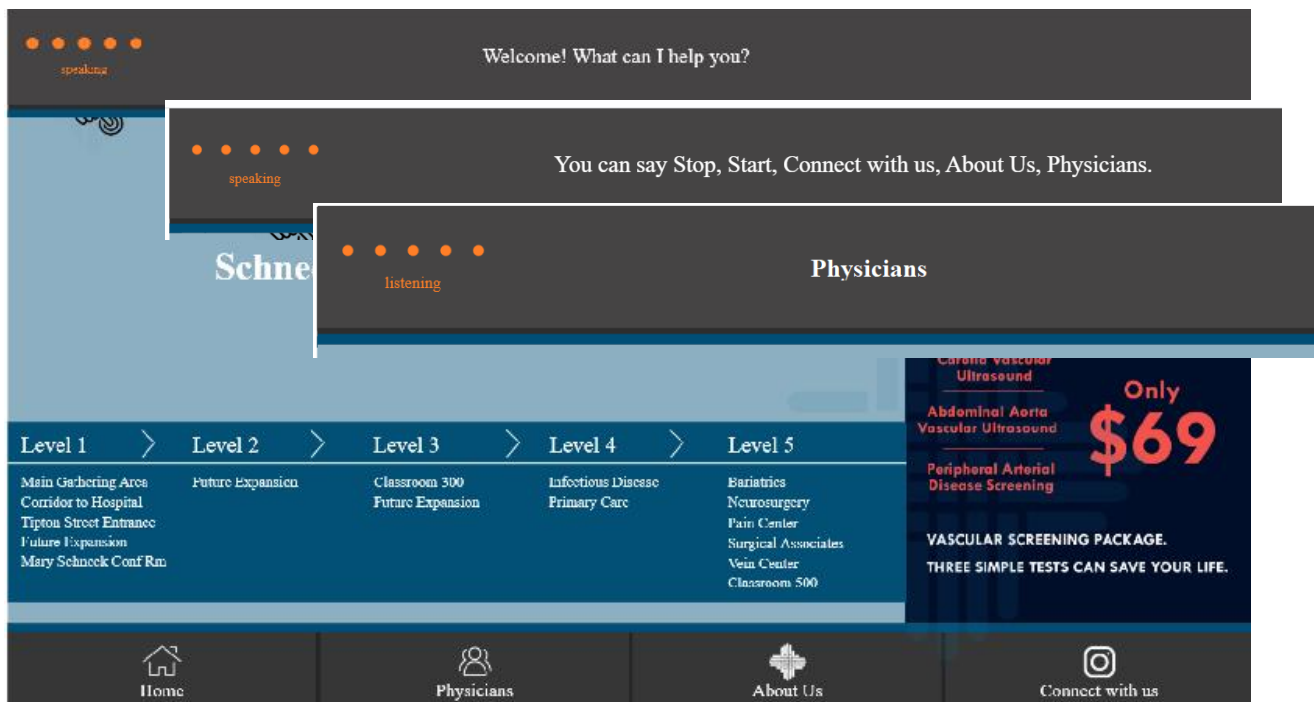

22Miles VOICE ACTIVATION & CONTROL

“Touchless Touch Brings Efficiency, hygiene, & Safety”

Create a fully interactive touch-free user experience through Voice Activation/Recognition & Control. A component of the Digital Signage Solution Publisher Pro.AIoT, no matter the kiosk, location, or signage application, COVID-Proof the experience for users with a technology that is becoming the new standard.

- Basic version: allow visitors to backward/forward slideshow in rotating advertising
- Advance version: allow visitors to fully engage interactive content without a touchscreen
- Can use with 22MILES Carry2Mobile for full interactive user experience without touching a public device

Carry2Mobile™ -Touch Lite Mobile

A simple text message carries a link to open same information on user's mobile phone.

The Link can trigger either a web based interactive slide, or additional content designed to get more touch points off the consumer.

Add another trigger point such as a "MORE" button to really get them excited to learn more, and once they do you can immerse them in an entire User Experience that is designed through our Publisher Pro with HTML5 design controls.

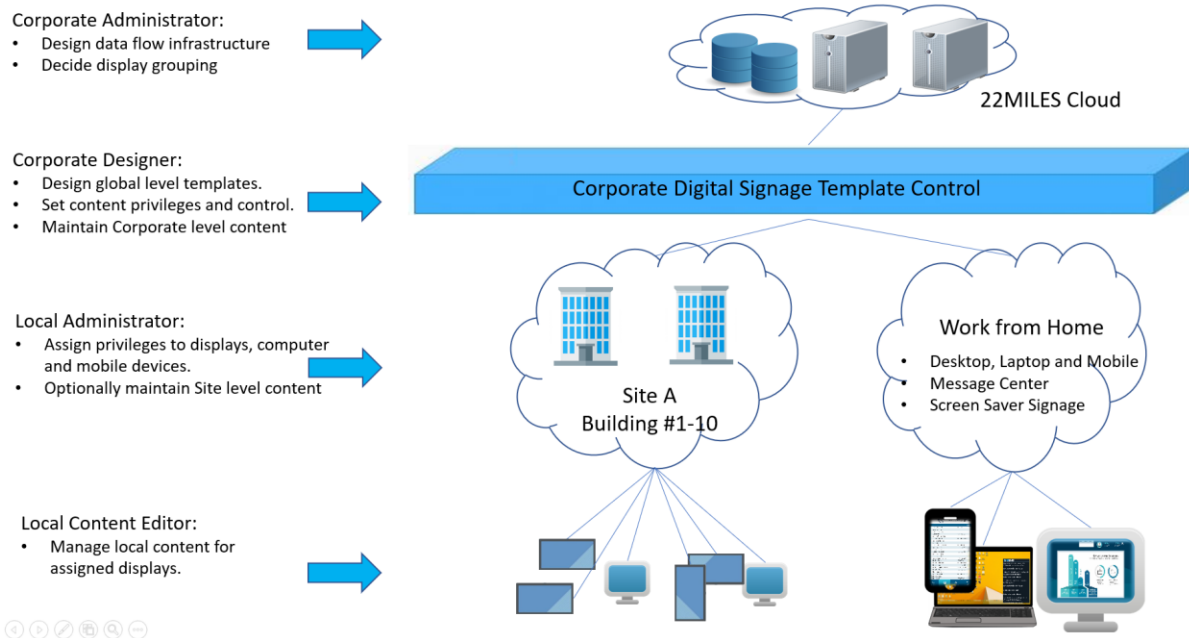

22Miles DIGITAL NOTIFICATIONS SUITE (DNS)

22Miles empowers organizations with a desktop solution that can keep remote-working organizational staff aware of all company announcements, news, and other live information in real-time. Desktop Digital Notification automatically enables content distribution through a widget type design tool, allowing administrators of your organization to dynamically change, transmit and update information daily.

- Keep staff current with all projects and communications in current COVID-19 Situation
- Designed to maximize efficiency for remote employees & team members
- Easily installed across devices
- Activate on a per user, per department, or company wide
- Edit design quickly, & instant scheduling & deployment

Corporate Signage Infrastructure with Work from Home Devices

Digital Signage Quick Install Bundle

Difficult times can also call for rapid triage and information sharing, often needed in inhospitable environments. To address these rapidly evolving needs, 22Miles have teamed up with partner [Peerless-AV®](#) in offering a [bundled solution](#) immediately available to deploy. The solution includes a 49", 55" or 65" UltraView™ UHD Outdoor TV, SmartMount® Flat Panel Cart, and a Content Management System, to accommodate a variety of considerations. By making the switch to digital, you will no longer need to manually update static signage throughout the day, nor develop static content in multiple translations to accommodate a diversity of languages. Instead, digital content can be updated in real-time once connected to a network, creating significantly more efficient workflow and information dissemination.

Bundled Digital Signage Package Includes:
