

# NANONATION

With vertical markets in retail, hospitality, financial services, QSR, education, healthcare, and more, we can help you engage any audience in any environment. Nanonation has in-house software, services, design, and support that work together to successfully power experiences in over 30 countries.

Whether you need an enterprise class digital signage CMS or a single interactive screen, we have a library of solutions to fit your needs. While off-the-shelf solutions work of many of our customers, custom is also in our comfort zone. Nanonation's in-house team of developers and designers are experts at creating unique and impactful solutions. Our trained project managers ensure that everything goes smoothly from concepting to implementation.

# TRUSTED EXPERIENCE

Over the past two decades Nanonation has helped some of the worlds more recognizable brands and organizations create amazing digital experiences. We are more than a technology provider; we are a team of dedicated specialists to help you transform the customer experience in your environment. From digital messaging to product information to store audio, our platform drives all of your in-store solutions. Our work spans from retail and financial services to governments and museums, we have crafted thousands of solutions and deployed over 100,000 endpoints around the world. Our clients include brands such as Nike, American Eagle, Harley Davidson, Rogers Wireless, State of Nebraska, Tabitha Health, Pinnacle Bank and many others.

# USER INTERACTION EXPERTS

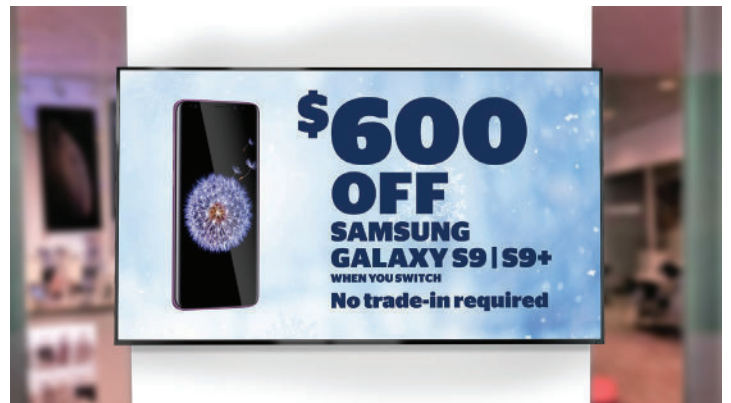

Designing for public-space touch screens is nothing like web or application design. Our in-house team of creative experts builds best-in-class user experiences that match your audience's unique needs. We understand your brand, your users and create a user interface that is as functional as it is visually impactful.

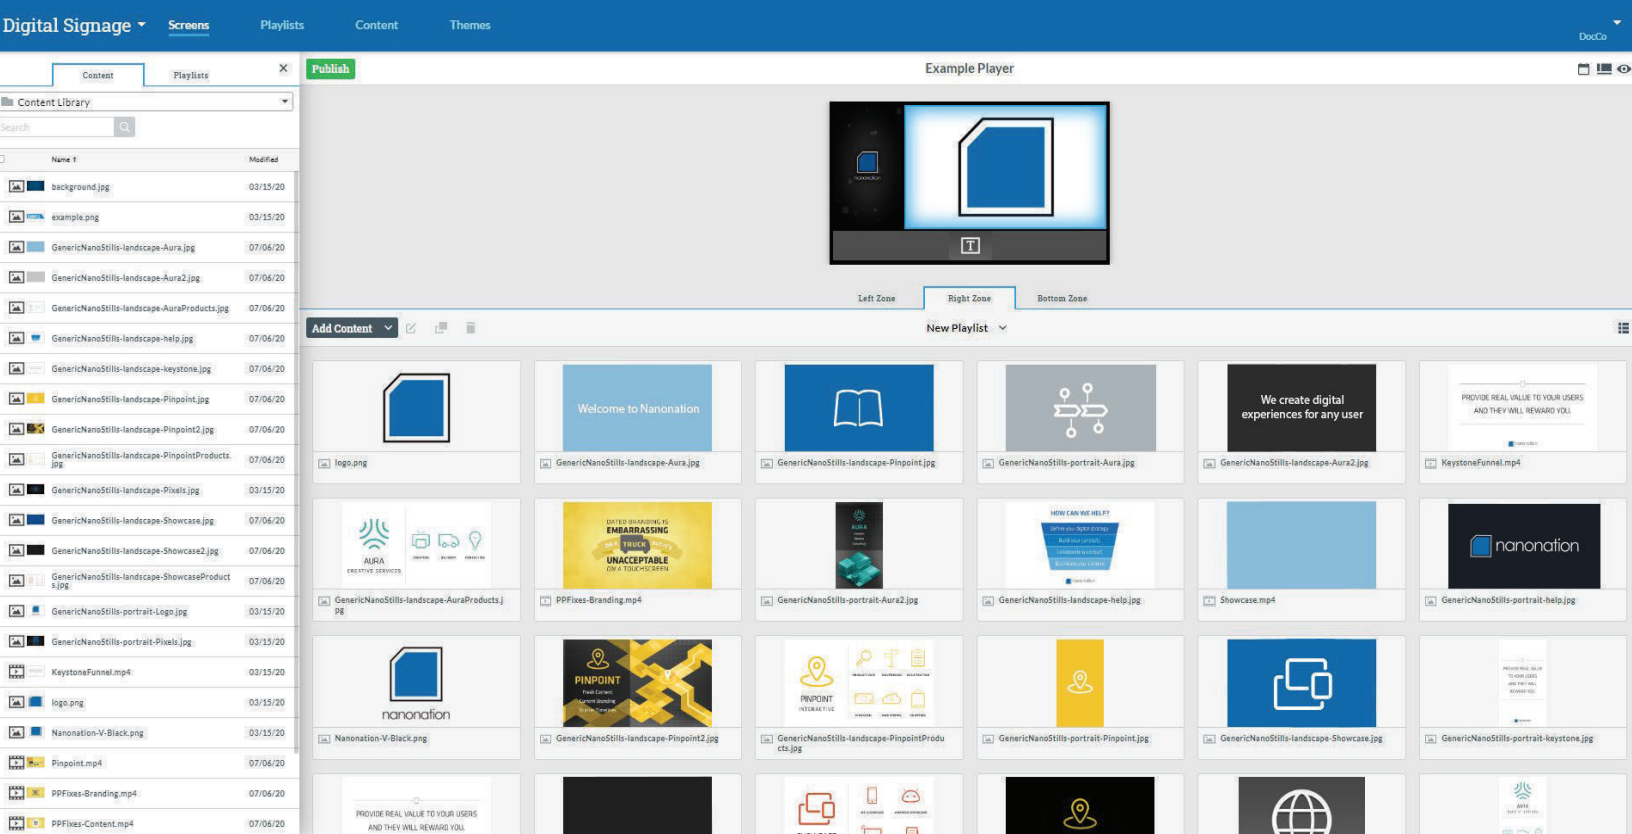

# SOLUTIONS

Whether you need an enterprise class digital signage CMS or a single interactive screen, we have a library of solutions to fit your needs. While off-the-shelf solutions work of many of our customers, custom is also in our comfort zone.

Nanonation's in-house team of developers and designers are experts at creating unique and impactful solutions. Our trained project managers ensure that everything goes smoothly from concepting to implementation.

We bring extra value to our custom solutions through our proven Nanopoint software platform. A platform built for public-space that includes reporting, monitoring, content management and robust security features. Layered on top of Nanopoint is the unique custom implementation that is created for your specific needs and users. The result is solutions that are built faster, for lower cost and are more scalable.

# COMMANDPOINT – OUR CMS

Control your digital signage or interactive kiosk from your browser with Commandpoint. Our cloud-based management portal allows multiple users to manage a network of screens and publish content quickly and easily. Simple yet powerful, Commandpoint is an enterprise-class platform that can meet the needs of a global scale network or a single unit deployment.

- > Simple User Interface
- > Security-First Focus
- > Near Real-Time View of the Screens
- > Online Preview Prior to Publish
- > Robust Scheduling Capabilities
- > Simple & Complex Playlist Functionality
- > Localized Hours of Operation
- > Template Library
