COMPACT CARD PERSONALIZATION MODULES FOR SELF-SERVICE KIOSKS

KC200 and KC200B printers offer cost-effective solutions to enable instant issuance of personalized plastic cards. The Evolis Premium SDK and the total accessibility of the various components and connectors allow KC200 and KC200B to be smoothly integrated into any type of self-service kiosks.

COMPACT AND ROBUST

- KC200 and KC200B printers successfully combine compactness and autonomy with a 200-card feeder.
- KC200 and KC200B benefit from Evolis latest innovations in card printing modules. The metal housing of these printers makes their integration into your system simpler and durable.

CONFIGURATION ON DEMAND

- You can easily configure card management: cards returned using an exit slot (bezel on KC200B printer) and different configuration possibilities like frontal or rear feeding and card exit.
- KC200 and KC200B solutions are fully modular: they can print either single or dual sided cards and can also be equipped with encoders for magnetic stripe or for contact and contactless smart cards.

EASY TO USE

- In order to limit and facilitate everyday maintenance operations, KC200 and KC200B printers offer remote notifications on the status of the printer and consumables such as the card or ribbon level alert.
- Thanks to the Evolis Premium SDK, you can integrate KC200 and KC200B into your own application and monitor them over a local network or the cloud.
