

JAWS®, the world-wide leader in screen reading, has been adapted in order to meet the specific needs of an accessible kiosk deployment.

- Thinner version of JAWS for closed environments
- Locked down features for use in closed environments
- Support for Storm Assistive Technology Products (NavPad™, NavBar™, and AudioNav™)
- Multi-language/Multi-voice JAWS support
- User session management
- Auto start JAWS upon insertion of audio device
- Auto stop/session end automatic upon withdraw of audio input
- Compatible with kiosk system software
- Fully customizable through JAWS scripting
- Does not require an internet connection for full functionality
