

# CLOVER ORDERING KIOSK

Nanonation's software combined with Samsung's KM24A kiosk hardware provides a robust, easily implemented platform for Clover POS customers to smoothly add ordering kiosks to their restaurant with minimal setup and effort. The self-service ordering kiosk pulls the locations existing menu from Clover into the kiosk, via Nanonation's Content Management System (Commandpoint).

Customers continue to manage their menu in Clover with it automatically synchronized to the kiosk. Restaurants can easily configure menu options and brand the kiosk interface to suit their branding needs in Commandpoint.

Orders placed on the kiosk are sent to the Clover POS as if placed from any other Clover terminal. The payment process utilizes the Clover Flex terminal mounted to the thermal printer built into the Samsung kiosk then prints the user's receipt with order number.

Nanonation is an experienced kiosk software developer with an enterprise-class backend CMS platform. In addition to the Clover Ordering Kiosk, we can design and implement a wide variety of custom solutions for the Samsung kiosk and Tizen platform.

## FEATURE OVERVIEW

- » **Cost-effective self-service solution for QSR/ Fast-Casual of any size**
- » **Drop-in solution for Clover POS customers**
- » **Automatically syncs with price and menu changes**

**Easy-to-  
implement ordering  
kiosk solution for any QSR/Fast  
Casual Restaurants utilizing a Clover POS.  
The kiosk operates on the Samsung KM24A kiosk  
with a Clover payment terminal attached to the unit.**

# DIGITAL SIGNAGE FOR SAMSUNG TIZEN SoC

Nanonation's enterprise-class software, Commandpoint, paired with Samsung's Tizen-powered display hardware, provides an easy to deploy digital signage solution. Effortlessly manage content and monitor a signage network from anywhere in the world from an easy-to-use cloud-based platform. Group digital signs based on type, physical location, or other categories. Commandpoint uniquely lets content managers target content to locations, regions, store types and even day-parts at the individual item level—helping boost profits through proven engagement techniques.

Nanonation helps turn Samsung displays into the perfect digital signage solution for retailers, schools, restaurants, hospitals or any other space needing digital communications.

Commandpoint cloud-based software comes with a complete library of professionally designed templates to streamline the setup process and allow users to get signage up and running quickly.

## BENEFITS OF NANONATION

- » Enterprise-class CMS tool
- » Support for large scale deployments
- » Powerful scheduling and targeting tools
- » Simple deployment with Tizen SoC
- » Backed by 24x7x365 support

Maximize the retail shopping experience through digital signage solutions by cross-selling and up-selling to customers as soon as they walk through the door. In addition, create a memorable experience and build long term relationships with customers through loyalty program management, registries, or data exchange applications.
