Space Utilization

Our Solutions

22Miles is the global leader in cross-functional digital signage solutions. Our flexible system is a forward-thinking platform for organizations and facilities of all markets, providing digital connectivity, visual communications, media management, and adaptive multi-point interactive experiences.

Powered by an immersive, easy-to-use content management software, the process of creating, managing, and enhancing any client's designed content has never been more accessible. With fully customizable integrations spanning digital signage, space management, room scheduling, interactive 3D wayfinding, contact-less interaction technology, large array video walls, native or HTML mobile apps, and more, 22Miles brings limitless content experiences from idea to installation.

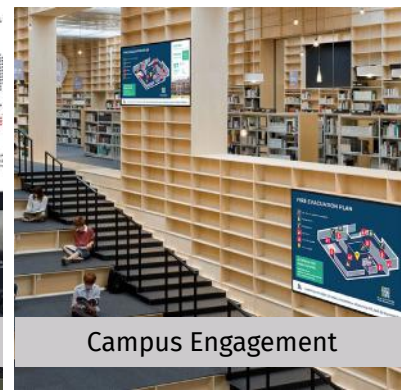

Workplace Management

Healthcare Communications

Govt. & City Communications

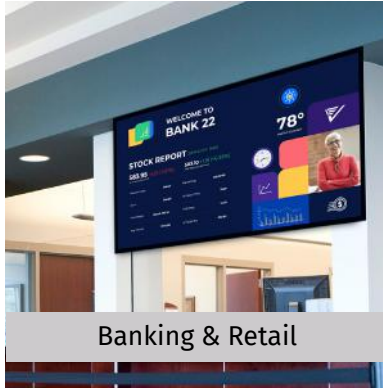

Campus Engagement

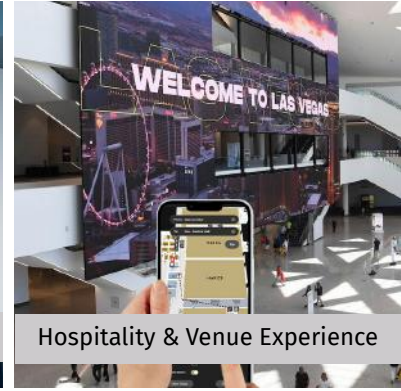

Mixed Use & Tenant Experience

Airport & Transportation

Banking & Retail

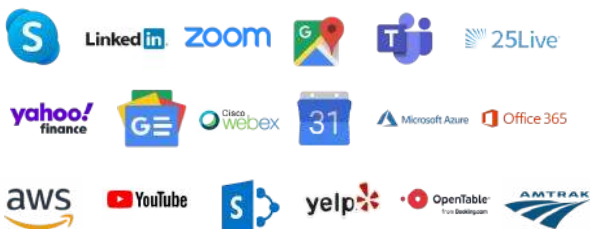

Hospitality & Venue Experience

Who we serve

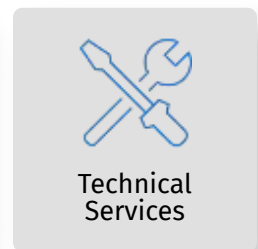

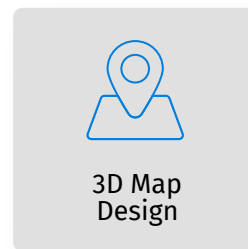

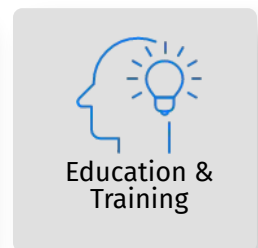

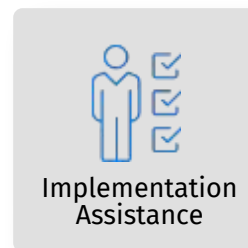

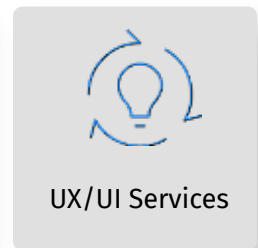

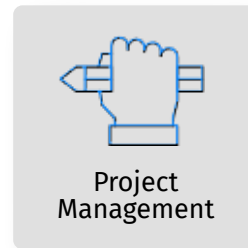

22Miles creates a unique experience for agile environments, interactive applications, directories, and visually impactful informational content for healthcare, education, venues, corporate workspaces, experience centers, transportation hubs, government, smart cities, retail, or large campuses.

Limitless Possibilities for Connection

22Miles seamlessly incorporates your organization's essential information, emergency alerts, news, stats, events, and other data feeds vital to you into singular system management automation. These feeds will update dynamically on their own, allowing you to perform your day to day activities with displays functioning independently in the background. All changes that are made to the original data feed auto-sync directly to the displays. This self-managed solution will automate the entire process of updating your display's visual communication and infotainment. All 3rd party software and open APIs are supported through 22Miles' native data source integration capabilities.
